

**CLINICIAN FINDINGS:**

- Rapid mode of action
- Efficient and easy to use
- Already recommending to others

‘After using CELOX™ PPH, we don’t have emergency hysterectomies’

**‘I can testify to the importance of this product in my everyday practice’... It has been something that has changed ‘our management of PPH...’**

Dr Edvin Vaso, Medias Municipal Hospital, Romania

Dr Vaso explained that while ‘maternal mortality from PPH was high all over the world,’ he felt there had been only ‘a little progress managing it in recent years.’ It was this background that led him to try CELOX™ PPH in December 2022.

He said that before using CELOX™ PPH, he could never be confident that his patient would have a good outcome – and the product’s use has actually ‘changed [his department’s] management of PPH.’

Dr Vaso also talked about how he valued its ‘effectiveness in a short time’ and ‘the importance of this product in my everyday practice.’

***Now, he says he never goes to a patient suffering severe bleeding ‘without CELOX™ PPH in my pocket.’***

# Gathering data to prove the efficacy of CELOX™ PPH

Dr Vaso presented his initial findings from the use of managing PPH with CELOX™ PPH at the Romanian Congress of OG in April 2024. He is now in the process of gathering the data from all over Romania, which he plans to publish as soon as it becomes available.

***‘My experience using CELOX™ PPH shows that using it immediately after drug treatment has the best results.’***

***‘I am already recommending other clinicians to use CELOX™ PPH.’***
